

WHAT IS CLAIMED IS:

1. A surfing exerciser comprising:

a base with a motor disposed on the base, a wheel connected to an end of the motor and driven by the motor;

5 a frame disposed on the base and an arm having a first end pivotably connected to the frame, a second end of the arm pivotally connected to a first end of a link, a second end of the link eccentrically pivotably connected to the wheel, and a board pivotably connected to the link.

2. The exerciser as claimed in claim 1, wherein the first end of the link
10 includes a top surface and the board is disposed on the top surface of the link.

3. The exerciser as claimed in claim 1, wherein pivotal devices are disposed between the board and the link.

4. The exerciser as claimed in claim 1 further comprising two pedals which are pivotably connected to the board.
